XYRALITY
IMMERSIVE WORLDS

Ruby on Rails Developer (m/f/d)

Since the publication of its MMOGs „Lords & Knights", „Fortress Kings" and „Mission Chief", XYRALITY has become one of the most successful mobile games studios in Europe. Over 60 dedicated employees work on the further development of our game portfolio to this day.

We are currently looking for a Ruby on Rails Developer (m/f/d) to join our talented and motivated team.

Your responsibilities:

- Work closely with other departments to verify designs, give feedback on planning and implement new features according to specification
- Upgrade a Ruby on Rails 3 application to Rails 6
- Support the continuous learning process of the whole team by sharing your Ruby on Rails knowledge

Required skills & experience:

- Several years of working experience in developing web applications with Ruby on Rails
- Expertise in improvement of existing architectures
- Passion for UI development with Bootstrap and JQuery
- Willingness to work highly independent, self-motivated and become creative on challenging problems
- Technology Stack: Ruby on Rails 3-6, Bootstrap 3 and 4, jQuery, CSS and SASS, PostgreSQL, Git, Jenkins, Web Components, Webpack

We offer:

- A challenging, but also promoting working atmosphere
- Responsible tasks, fast decision-making process and space for the implementation of your own ideas
- A team-oriented working process, which visibly incorporates the results of your work
- Unique expertise in the development of cross platform games
- A modern, young work environment including free fruit and beverages
- HVV ProfiTicket subsidy

If you are interested in this unique opportunity, please send your complete application with salary expectations in a PDF file to jobs@xyrality.com. We would appreciate information, where our job advertisement caught your attention.
